THE COMMISSIONER OF PATENTS
WODEN ACT 2606

Sir

P.C.T. Application No: PCT/AU99/00576
INTERNET UTILITY INTERCONNECT METHOD AND MEANS
EHOME CORPORATION PTY LIMITED

We thank the Examiner for their first Written Opinion issued with respect to this application and dated the 31st January 2000.

In response to the Written Opinion, we have now made amendments to both the specification and claims, which we believe should render the present application both novel and inventive over all of the cited prior art.

In particular, the claims have been amended to clearly elucidate that not only does the second control means communicate with the first control means but the first control means also communicates with the second control means. Thus, when the status of an electrical apparatus has been altered, the new status communicates with the first control means as well as to the second control means, such that the second control means then alters the dynamic memory to reflect the status of the apparatus.

In other words, the present system provides for either the apparatus itself to be changed, which then updates the dynamic memory, or for the dynamic memory to be changed which then alters the apparatus. This is a bi-directional link which is quite novel and inventive over the prior art all of which essentially teach a uni-directional link.

All of the other independent claims have also been so amended to reflect this bi-directional link. We therefore seek a clear Written Opinion with respect to the present application.

Yours faithfully
COLLISON & CO
